## SYRUP RECIPES:

**Simple Syrup:** Equal parts sugar & water (1:1 ratio) | Combine the sugar & water in a small sauce pan and bring to a simmer. Continue simmering, stirring until the sugar dissolves. This will only take a few minutes. Remove pan from the heat, and let it sit to cool down to room temperature. After it's cooled down, go ahead and transfer it to a container. You can store the simple syrup in the refrigerator for up to a month.

**Grenadine:** Equal parts pomegranate juice and superfine sugar (1:1 ratio) | Combine juice and sugar, shake until the sugar dissolves

**Demerara Syrup:** Equal parts demerara sugar & water (1:1 ratio) | Same prep instructions as simple syrup above.

**Jalapeno Syrup:** Equal parts sugar & water (1:1 ratio) + 1 jalapeno pepper | Mix sugar and water, boil to make a basic simple syrup; add jalapeno pepper, sliced lengthwise with seeds included; bring to a quick boil again, then let simmer for 10 minutes; let cool.
